SPRING 1959

● OUR GUARANTEE

All items are guaranteed to be true to name and of the size and age indicated. We have been growers of lining out stock for 95 years and consider our host of old and new customers our greatest asset. We always strive to please and do not consider any deal complete until our customer is satisfied in every respect.

● TERMS

Cash in full with order earns 3% discount. Boxing and baling will be charged at actual cost only. Cash customers will be billed for boxing after shipment.

● TO ESTABLISHED CREDIT

2%—10 days from date of invoice. All accounts due 30 days from date of invoice.

● RATES

25 of same size and variety earns 100 rates, 250 of same size and variety earns 1000 rates. If less than 25 trees of same size and variety are ordered, add 20% to 100 rate.

● SEEDLINGS

Indicated by age, and the word 'sdlgs.' following. For instance, 2 yr. 'sdlgs.' indicates seedlings two years old and not transplanted

● TRANSPLANTS

Transplants are indicated with an 'X' after the item, and each additional 'X' means an additional transplanting, such as XX indicates the item is twice transplanted.

Please do not order less than 100 plants unless you plan to pick these up at nursery since shipping containers by common carrier is not economically feasible. We are usually able to arrange delivery by our truck at a reasonable cost on split load amounts from 100-700 plants. 700-3,000 are truckload lots which we deliver at cost. You are always welcome at the nursery to pick up any amounts of 10 or above.

PART OF OUR CONTAINER NURSERY

CHRISTMAS TREES

Approximately 50 to 60 million Christmas trees are used in this country annually, and the growing of them in commercial plantations is getting to be a very lucrative business. Good planting stock is imperative for success. We grow large quantities for this very purpose and can supply quality trees at readonable prices. Plant a few acres every year and you will soon have a nice annual income. We would be happy to advise you on soil, cultural practices, etc.

Seedlings are often planted for Christmas trees in an attempt to save money. It is false economy. True, seedlings cost much less, but as good survival can never be expected from seedlings as from transplanted stock. The few extra cents a good transplant costs brings tremendous dividends for survival is excellent, the need for replanting is eliminated, and saleable trees can be grown two to three years sooner than if seedlings were used.

The varieties listed next page are the most used for Christmas tree planting, although Douglas Fir, Concolor Fir, and Ponderosa Pine are also frequently used. Write for special quotations.

The sizes on next page have wider variance than the same variety offered elsewhere in this list. By saving the cost of grading we can offer them cheaper, and for Christmas tree planting they are equally as good.
